

**Note on compliance with legal requirements
 ElektroG § 7a take-back concept – Germany**

According to the EU Directive 2002/96/EC of the European Parliament and the EU Council on Waste Electrical and Electronic Equipment (WEEE), as well as the revised EU Directive 2012/19/EU, there is an obligation to organize and finance the collection, treatment and disposal of waste electrical and electronic equipment in accordance with the aforementioned regulations. According to the Electrical and Electronic Equipment Act (ElektroG) in Germany, every producer is obliged to implement a reasonable process for the return of waste electrical equipment from users outside of private households.

We take our responsibility seriously and ensure a high-quality recycling process for our products when they become waste. For devices that have been used commercially or in public institutions - so-called B2B devices - we provide convenient return and disposal solutions.

KTS - Kommunikationstechnik & Systeme GmbH has concluded a recycling agreement with certified partners to organise the transport, preparation for re-use, recycling and recovery of waste electrical equipment.

KTS GmbH bears the costs for the treatment, recycling and recovery of KTS GmbH products. In return, KTS GmbH asks its customers to bear the costs of transport to KTS GmbH.

Returning and disposing of old appliances

You would like to dispose of an electrical appliance purchased from KTS GmbH correctly. You may instruct a carrier of your choice or an appropriate parcel service to send the waste electrical equipment to our warehouse.

Please click on the link below and fill out the form.

Please print out this file and attach the printout in a clearly visible position on the consignment containing the waste electrical equipment.

Personal responsibility with regard to the deletion of personal data

We explicitly point out that according to § 19a ElektroG you are responsible for the deletion of any personal data on the appliances considered for disposal.

Meaning of the symbol for the marking of electrical appliances

The symbol of the crossed-out wheeled bin on electrical appliances indicates that they must be collected separately and that they may not be disposed of with household waste.
